

Moldings

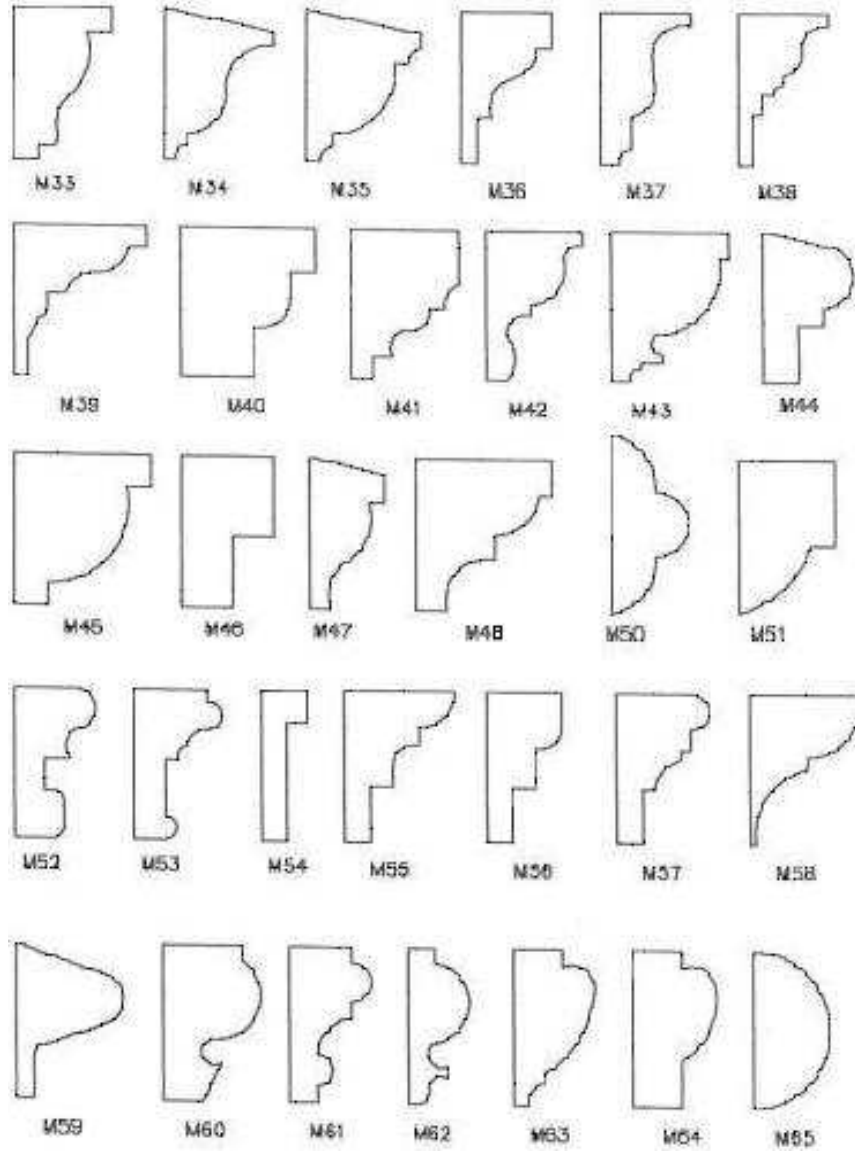

The following pages show a few of the possible designs. Each of the designs can be modified to fit any application. When ordering, indicate the desired measurements for the backside (a) of your piece and/or topside (b) for an exact fit.

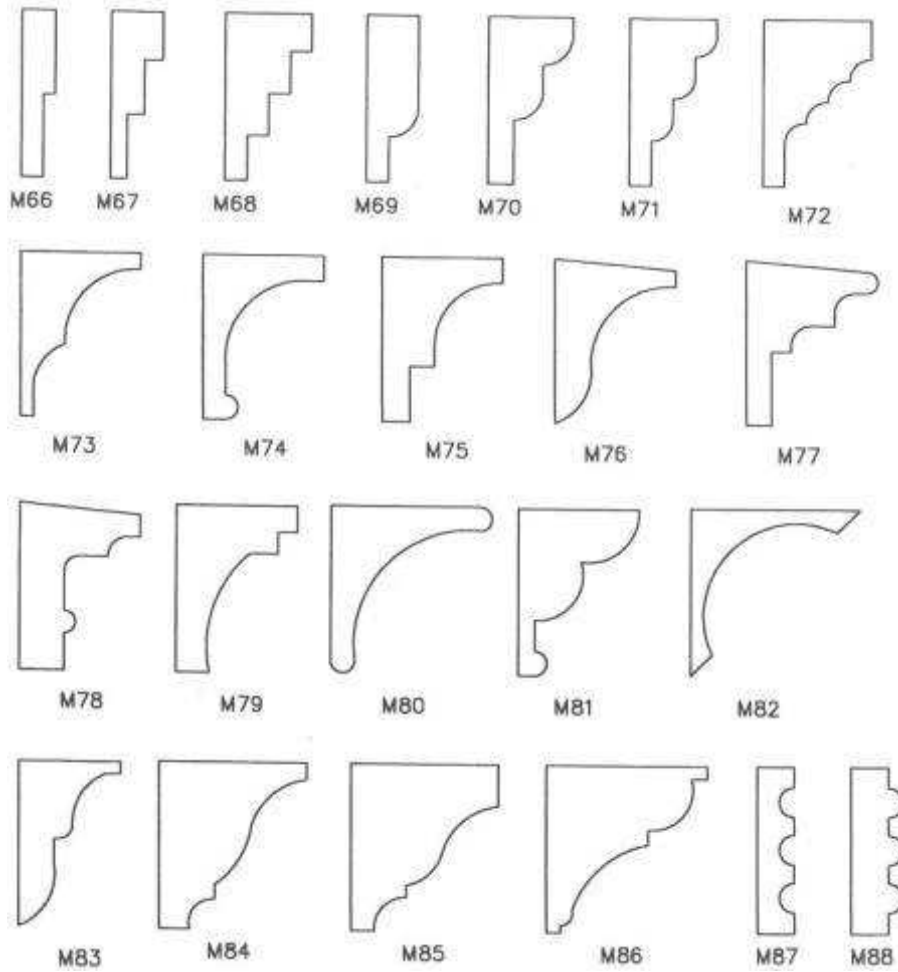

In some cases, your "b" measurement may not be as critical as the "a" measurement. If a design you like needs to be larger or smaller than indicated, this will not be a problem. We will adjust the size of the design -in proportion to the "a" measurement supplied. This can be done with no extra tooling or expense involved which gives unlimited- designs. Please note these adjustments may cause the face of the design to change slightly. Also, any thickness may be added or removed to any portion of the design as indicated by dotted lines in example (3). Please indicate any changes when ordering.

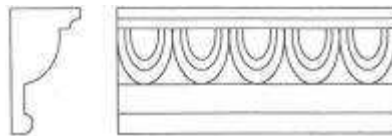

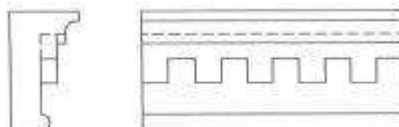

Because of the unlimited variations in size, shape and design it is impossible to publish prices. Please call for quotes and / or price consultation.

Egg and Dart Moldings

Dentil Moldings

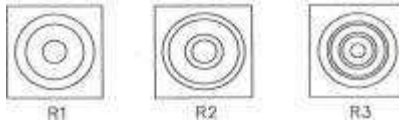

We can do any size Dentils and usually design them in pre spaced units 24" long to fit recessed areas in the molding as indicated by dotted lines.

Rosettes

Rosettes offer a simple and attractive option to enhance door and window casings. These rosettes compared to wooden rosettes, however, may be ordered to range in size from 5" to 20" or larger to accent any project.

Fabricated Recessed Panels
